Wayfinding is seen as an information system that guides people and enhances spatial experience.

The process goes beyond signage design to include space analysis, traffic flow planning, and signage needs assessment.

Floema®

If there's a way,
we **will find** it.

how do we work?

1

Collecting data
Identify needs

2

Circulation
flow plan

3

Media typology
Quantification

4

Signage design

5

Signage is a chance to create impactful touchpoints for your brand.

Small details that have a big impact.

Make a statement, your statement.

RIAPALACE

Directional signs, arrows, and directories are essential elements of a signage project, guiding users to their destinations by indicating clear paths.

When in doubt,
just follow the
signs! ↖ ↗ ↘

Users should effortlessly identify key spaces and understand what lies beyond doors.

Clear signage for restrooms, rooms, event halls, and services promotes smooth navigation and organized flow.
